To Whom It May Concern:

Re: Letter of Reference for Matthew Gordon

I am very pleased to recommend that Mr. Gordon be considered seriously for a secondary school teaching position in Broad-based Technological Education. In my experience, Mr. Gordon demonstrates a committed professional attitude toward learning about teaching and performs admirably in the academic setting.

To elaborate somewhat, Mr. Gordon has both personally and professionally established himself in this program. He is presently enrolled in the B.Ed/Dip.Ed Teacher Education Program at Queen's University, Faculty of Education. As Mr. Gordon's instructor of two core program courses, Teaching Technological Education (CURR360/361) and Program Focus-Technological Education (FOCI213) for the current academic year 2014/15, I am pleased to state that Mr. Gordon is progressing at the honours level thus far. He consistently shows exceptional leadership qualities and a commitment to life-long learning in both his professional life and in Faculty of Education programs.

All course related workshops and coursework are performed and submitted in a timely fashion and the quality of Mr. Gordon's work both pedagogically and subject related (Construction Technology) is exemplary. He is professional in his dealings with peers and colleagues, and is a pleasure to have in class. Given his many positive attributes, I am convinced that Mr. Gordon will be a credit to the school board which hires him.

Sincerely,

Ena Holtermann
Adjunct Professor
Technological Education
